Steve,

DOI has 9 Unmanned Aircraft Systems and pilots that are available for our use. Would these be useful for reconnaissance at the Arkema facility? Attached are two informational sheets on the assets.

I'm pretty sure they are the solo quad copters (3 ea), but our team lead could provide more info on capabilities. Info below. We have the other resources on standby, so theoretically we could mobilize other assets.

Thank you, Kevin. There are four types of UAS on the info sheet, are all four types available?

Hi Jen,

As mentioned, DOI has 9 Unmanned Aircraft pilots and aircraft in College Station. They have been supporting ESF-9, but those missions seem to be ending. Just wanted to share the capability in case ESF-10 had any need for support. Attached is some info on capability. A new MA or update would probably be required. Happy to connect your field folks with the Team Lead for more specific discussions.
